

Innovating for the Future:

A Young Innovator's Guide

Introduction:

Innovation is about creating new ideas that make life better. But how can young people like you become innovators?

What is SDG 9.1?

This goal emphasizes the importance of building sustainable infrastructure. It's about creating systems that are not only efficient but also kind to our planet.

Your Role as a Young Innovator:

You have the power to think outside the box. Whether it's designing eco-friendly products or finding new ways to use technology, your innovations can lead the way.

Activity Idea:

Start a project at school where you and your friends come up with ideas to make your community more sustainable. Share your ideas and see how they can be implemented!

Conclusion:

Remember, every great innovation starts with a single idea. Your creativity can help achieve SDG 9.1 and make the world a better place.
